Stellar employees receive Rotary awards

**Kraft accepts National Space Trophy**

Former JSC Director Dr. Christopher Kraft Jr., left, and veteran journalist Walter Cronkite came to be regarded as an authority on America’s space program, reporting on the first two decades of this country’s manned space missions, from Alan Shepard’s first flight in 1961, and the Apollo 11 moon landing in 1969, to the experimental flights of the space shuttle Enterprise in July 1977 and the fall of Skylab in July 1979.

Other award recipients included JSC’s Jay Greene who received a Stellar Award for his unique contributions as a key architect of the nation’s space program, specifically in the areas of planning, and operational control of manned space programs in the Mercury, Gemini, Apollo, Skylab, Apollo-Soyuz Test Project and the space shuttle.

Former Astromaut Gregory Harbaugh, now manager of the EVA Projects Office, earned a Stellar Award for his leadership of the Extra-vehicular activity planning team.

JSC's Chris Hansen received a Stellar Award for structural design and analysis of space flight hardware, including the space shuttle crew seat redesign, orbiter landing gear, and the International Space Station Thermal Control Module.

Robot, geologist perform tests for future explorations.

Rainforest: a wet and wild adventure.
